

WHY I BUILT

ADVERSARIA

Meetings create more work than I have time for.

Mohammad Hamza Laghari

Lead AI Engineer / An ongoing Laghari Labs project

EVERY ACTION ITEM COSTS ME TIME

1 - 2

HOURS

Research the options.
Draft the architecture.
Write the follow-up.

Then the next meeting starts.

WHAT GETS SQUEEZED

MY OWN PROJECTS
GET THE TIME

LEFT OVER

I needed help with the work
that meetings create.

LOCAL MEETING NOTES

A memory I can come back to.

ON MY MACHINE

AUDIO. TRANSCRIPT. NOTES.

Capture the discussion and keep its context
with the work that follows.

Desktop local mode runs on-device. Cloud features are optional.

HELP WHILE I'M IN THE ROOM

WHAT TO SAY NEXT

Relevant context and suggestions for what to say.

A COMMITMENT I CAN ACT ON

Surface the follow-up so I can review it.

THE WORK HAS A PLACE

Meeting context stays with the task.

RESEARCH

EXPLORE THE
OPTIONS

Sources and a draft to review.

ARCHITECTURE

MAKE THE
SOLUTION VISIBLE

Solution diagrams in the workspace.

I approve the task. Adversaria drafts. I review the result.

TWO WAYS TO USE IT

01 DESKTOP

COPILOT + SPACES

Extended the companion
and workspace flow.

02 TERMINAL

ADVERSARIA CLI

Cloud speech, models
and research with my keys.

CLI: OpenRouter + Exa / Optional OpenAI / Codex uses its own login

WHY I KEEP BUILDING

MORE ROOM TO BUILD

That's why I built Adversaria.

Hamza's ongoing project at Laghari Labs.

```
./adversaria setup then ./adversaria
```
